

CHILDREN AGED 9 MONTHS SOUGHT FOR PARTICIPATION

in communication study

WHAT'S IT ABOUT?

By participating, you will help us to better understand the early communication development of children growing up in monolingual and multilingual environments and to improve the early detection of children with language development disorders.

WHAT TO EXPECT?

We invite you and your child to five sessions of joint play in our Research Laboratory for Communication and Language (FoKuS) at the Hubland Nord campus of the University of Würzburg. As expense allowance, you will receive €10 per session and your child will be given a small gift. Participation in the study is voluntary and can be discontinued at any time.

WHO CAN TAKE PART?

All children growing up with one or more languages who are 9 months old at the time of their first appointment and who have not been diagnosed with any general developmental disorder.

Please feel free to contact us early before your child will turn 9 months so that we can schedule the first appointment accordingly.
